

FARM AND HOUSEHOLD.

Matters of Interest to the Intelligent Agricultural Readers.

INTERESTING THINGS FOR LADIES.

Hints for the Man Who Works the Farm and the House Wife Who Manages the Home--A West Virginia Agricultural Experiment Station Bulletin on the Sheep Industry.

To the Editor of the Intelligencer.

Sir:—Mr. A. D. Hopkins, of this experiment station, is preparing a bulletin upon "Sheep Industry for West Virginia," for free distribution by the agricultural experiment station. It has been with and has handled sheep all his life, and during the last two years has visited nearly every county in the state. Our convictions are that there are great possibilities in the growing of market lambs and fat sheep, as well as the production of wool, as the leading and most profitable farm products for many West Virginia farmers, and it will be the object of this bulletin to place in their hands valuable and practical information upon the subject of profitable methods and breeds; the treatment of diseases; insect pests, etc.

To make this bulletin of the greatest value, information is desired upon the following points, and sheep breeders and farmers interested in sheep husbandry are asked to correspond with Mr. Hopkins at Morgantown, W. Va., who will be glad to hear from every one who has any original ideas upon the care of sheep, pro and con, and losses of the business, etc. Answers to the following questions are especially desired:

What breed of thoroughbred rams seem to produce the best results in the improvement of common sheep?

What are the different breeds used for this purpose?

The name and address of each breeder of thoroughbred sheep is desired, and the name or names of the breeds kept by each?

What method of management seems to yield the greatest profit?

What diseases or other troubles, if any, are affecting the sheep?

These questions are intended to apply to each district or county, and should be answered accordingly. We trust that the farmers will feel at full liberty to write and give us the benefit of their experience and observations. Due credit will be given for all information in reply to these questions as far as published, and the bulletins will be sent free to all on our mailing list and to others desiring them.

During the coming year I desire to give the live stock industry of the state more special attention, and as a leader in this work I have selected Mr. Hopkins, who will discuss at length in one or more bulletins the questions relating to sheep husbandry.

I may add in conclusion that I have never known a farmer in this state, whostocked the sheep business through thick and thin, through good and bad report, who did not make money, and to-day, the uniformly successful farmers, in the sections of the state largely devoted to the raising of sheep, are the men who have given their principal attention to sheep. If properly managed, it is undoubtedly one of the safest and most profitable businesses in which farmers in this state can engage.

Let us have a prompt and cheerful response from the farmers and breeders.

J. A. MYERS,
Director of West Virginia Agricultural Experiment Station,
Morgantown, West Va., April 11, 1892.

GARDEN HINTS.

It is a laborious task to apply liquid manure to a strawberry patch, but it will be an advantage, especially in a garden patch, to select one row of the plants for forcing. This is done by applying liquid manure, two or three times each week, around the plants. Such plants should be grown in stools rather than in matted rows. Liquid manure can be made by using the urine from the stalls, adding fresh horse manure and diluting with water, if necessary.

For early plants a fertilizer solution may be prepared which will be almost a complete food for pot plants, or those requiring special attention outside. It may be mixed with earth and used around the roots also. Take one pound each of phosphate of potash, nitrate of soda, and sulphate of lime, mix well and add a tablespoonful to one quart of water.

Subsoiling is of advantage to some soils, especially when the drainage is used. Experiments made for the purpose of comparing subsoiling with a plot that was plowed, but not subsoiled, using sorghum as a crop, demonstrated that the crop was largely increased on the subsoiled plot, the subsoiled land yielding eighteen tons and the other ten tons.

For cuttings, in order to have them root early, use burnt clay. This may seem inappropriate, but in England the clay is found superior to sand or loam, as it is said to possess the property of absorbing ammonia from the atmosphere.

Freezing does not injure onions or onion sets, provided they are not disturbed. If kept in the garret there is less liability of the odor being perceptible in the house, which is not the same with the cellar. Keep them in thin layers and cover them with an old carpet.

The beautiful coleus plants, which are used for ornamental borders and for bedding, are produced from slips, but they are also easily raised from seed. Sow the seed early, in prepared boxes, in the same manner as for other early plants.

Radishes are very hardy, and grow quickly from seed. For an early supply sow the seed in a hotbed or cold frame. They will be out of the way in a short time, when something else, such as early cabbage, may follow.

When using manure for hotbeds discard all litter. Fresh horse manure is best and it should be well tramped down in the bed. To hasten the heat moisten the manure with lime water.

Use wire for fastening grape vines to posts or on a strip instead of using straws, as the straws may rot before the crop matures and the fruit injured.

THE HOUSEHOLD.

There is always a certain set of old ladies and a good many old men, too, for that matter, who are continually harping of the better quality of everything in their day as compared with the achievements of this modern era. Foremost in the list, especially with the aged dames, is the needlework that they claim has been entirely done away with since sewing machines, with their clatter and celerity, caused women and girls to slight their work, and, as these gentlewomen affirm, "throw the garments together." They rave over the embroidered baby clothes all done

by hand, the wonderful samplers, the daily stint of every young girl and sadly besmitten the falling off of this by-gone industry.

If, however, they were aware that the grand dames of to-day eschew all but hand-made underwear, would they not have to retract their stubborn statements and bow down to the more stubborn fact? The airy French creations that bring such astounding prices owe their worth to the careful stitching of the nuns, who, set each thread and weave every individual knot and pattern with their own hands.

Outside of the undergarments are not the styles of to-day in women's and children's clothes such that the machine work is only the foundation, and the touch that lends the needed grace and finish must be done by hand, or a dress has a "ready-made" air not exactly desirable?

Again, is not embroidery, in a decorative sense, brought to the zenith of perfection in these days, when forest and field yield up their floral beauties to be reproduced through the tiny steel instrument in an artist's fingers in porcelains, scarfs, table covers and mantle draperies?

Are not these designs as intricate and far more beautiful than the filling, in with cross stitch a group of impossible wretched roses, senseless and meaningless to all but the enthusiastic worker?

Is not the outline stitch of to-day, the very primer of modern embroidery, miles ahead of the dreadful card-board mottoes that used to ornament every household room with their set stitches and floral beauties clustering about some inspiring phrase?

Our girls may not sit up at night scattering gathers in the band of a petticoat or putting seven rows of tucks and insertion in their muslin gowns, which will be handed down as show pieces to admiring posterity, but they are able to darn their silk stockings neatly and well, hem, fell, cat's stitch, and gather good enough for all purposes, and when it comes to ornamental embroidery, the masterpieces of a past era must take a back seat before the beauties wrought by the fair hands of the girls of to-day.

What a Wife Should Be.

In a recent competition in England for prizes, here are some of the choicest definitions of a good wife:

She must be gentle and forbearing.
To little kids and fancies blind;
Yet strong enough to hold her own unwavering.
In time of trouble she the patient kind—
No selfish love of whimsical pleasure;
Faithful till death, meek, pure and good.
One to be honored as a precious treasure,
A very type of perfect womanhood.

This wife should be more than ideal—a fact, she needs it; she must have tact; With womanly courage and kindness of heart, Secure and good feeling must take their part. With a cheerful nature she must be best. Then of life's small pleasures she'll make the best.

In whatever station her lot is cast, Doing her duty from first to last.

Legal and gentle, tender and kind, Pulling her level with her husband's mind; With sympathies wide, and a well stocked mind, With tact for cheering, and judgment clear, Helpmeet sweet in life's toilsome day. Come, stand then in its truest style; True to her husband as to her God, Such, oh man, wouldst thou have thy wife.

She need not handsome be, nor yet possessed Of stately mien, or graceful form alone; She need not boast of rank or high degree, Or wealth of acres broad to call her own. But she must have a faithful heart to win And hold that other heart—a precious life—A sweet, wise influence, a trusting love; And she will be a helper—a true wife.

Exercise, Girls, Exercise!

Take a long brisk walk every day at a rapid pace. Sauntering does little good. All the calisthenics in the world don't compare with walking. Not only the walk, but "the open air"—if the day isn't too bad—will drive away headaches, "blues" and the innumerable disagreeable feelings which some people seem to think come from the wind.

HOW TO BOIL EGGS.

The Right Way is Not to Boil Them at All, Strange to Say.

Pittsburgh Dispatch.

Our woman—and her household ways are the wonder and envy of her friends—says the right way to boil eggs is not to boil them at all. First put the eggs into a wire basket with a tall handle; that saves the time and vexation of fishing them out with a spoon when cooked. Then set the rest of the eggs in a kettle or other vessel, with cold water enough to cover the eggs—not hot water, or warm water, but cold water. Set the vessel over a brisk fire.

Do not let the water boil, only just "come to a boil," and at that particular time—not before, not later—the eggs will be cooked as they should be.

THE ROARING LION.

Lies Down Before the Fire and His Skin Makes a Superb Rug.

Pittsburgh Dispatch.

The most superb of fur rugs are made from the skin of the lion. When the lion is five years old his mane has attained its full growth, and he is then ready to be sacrificed at the altar of civilization. The bears, and especially the grizzlies, are very popular. The white Polar bear is arranged in a very realistic manner, with his great mouth open and formidable claws projecting grimly from the soft fur. All these animals are displayed with one-quarter, one-half and full heads—that is, raised and stuffed in these shapes.

Deafness Can't be Cured.

by local applications, as they can not reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the eustachian tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surface.

We will give one hundred dollars for any case of deafness (caused by catarrh) that we can not cure by taking Hall's Catarrh Cure. Send for circulars, free. F. J. CUNNEY & Co., Toledo, O. Sold by druggists, 75c.

A Close Call.

Mr. J. P. Blaize, an extensive real-estate dealer in this city, narrowly escaped one of the severest attacks of pneumonia while in the northern part of the state during the recent blizzard. Mr. Blaize had occasion to drive several miles during the storm and was so thoroughly chilled that he was unable to get warm, and inside of an hour after his return he was threatened with a severe case of pneumonia, or lung fever.

Mr. Blaize sent to the nearest drug store and got a bottle of Chamberlain's Cough Remedy, of which he had often heard, and took a number of large doses. He says the effect was wonderful and that in a short time he was breathing quite easily. He kept on taking the medicine and the next day was able to come to Des Moines. Mr. Blaize regards his cure as simply wonderful and says he will never travel again without a bottle of Chamberlain's Cough Remedy.—The Des Moines, Iowa, Saturday Review. 50 cent bottles for sale by druggists.

JUST A LITTLE HELP.

That is All Which is Required at This Time of the Year—Do You Know What to Do?

We hear a great deal, just now, about Spring medicines. It is known that people feel run down after the labors and stress of winter, and it is assumed they need a Spring medicine. This is a lot of nonsense. Spring medicines are not needed; nature will throw off the rheum in the blood which have accumulated during the winter, if she has only a little help. Nature is able to clean her own house, and take care of her own household, with a little assistance, and a little gentle stimulant is all the Spring medicine any one requires. "But," you may say, "what do you mean by stimulant, and what do I require?" We answer, something absolutely pure, powerful, and which has been proved to abundantly answer the purpose. Unquestionably, whiskey, if of the right kind, is the proper thing to use, but unfortunately there are few good whiskeys in the market, and only one which is absolutely pure, and possesses medicinal qualities. That whiskey is Duffy's Pure Malt. It has been upon the market for years. It has the unequalled endorsement of physicians and chemists, and it is the only whiskey which can be recommended. It is true, certain unscrupulous druggists and grocers seek to sell other and inferior goods, claiming they are equal to Duffy's, but they possess little purity and no medicinal power whatever, whereas Duffy's is specially designed as a medicinal whiskey. It would be well to hear these facts in mind when considering the subject of Spring medicines, and how to best put the system in shape for the requirements of the season.

UNIVERSITY CADETS

Would Like to Come to Wheeling on the 30th of May to Drill.

Special Dispatch to the Intelligencer.

MORGANTOWN, W. Va., April 13.—A recent article in a Wheeling paper spoke in favor of having something like a competitive drill between the Linsly cadet corps and the University corps in Wheeling on the 30th of May. The corps would like very much to go to Wheeling on the 30th, if suitable arrangements could be made. Some of the members of the corps oppose going to Grafton this year because they have been there so often. But should arrangements be made for to other place they will probably go to Grafton, for they have been receiving good treatment from the Grafton people during all their visits there.

What a debt of gratitude the world owes to such men as Drs. Ayer and Jenner—the latter for the great discovery of vaccination, and the former for his Extract of Sarsaparilla—the best of blood-purifiers! Who can estimate how much these discoveries have benefited the race!

Carthage, Mo., has an undertaker named Knell.

Woman's Health and Life depend more on regularity than on any or all causes combined. An actual or living death is the result of derangement of functions which make women what she is; immediate relief is the only safeguard against wreck and ruin. In all cases of stoppage, delayed, painful or other irregularities Bradfield's Female Regulator is the only sure remedy. Sold at wholesale and retail by Logan Drug Co.

Yale undergraduates next year will have 128 electives to choose from as against 120 last year.

The Plea of Insanity. Cannot be urged in extenuation of the conduct of hosts of people who constantly inflict injury upon themselves, and lay the foundation for serious and disastrous bodily trouble by the use, in season and out of season, upon slight necessity and without discrimination, of drastic vegetable cathartics and poisonous mineral cholerics—notably the various forms of mercury—to relieve simply constipation, a complaint remediable at any stage by the persistent use of Hostetter's Stomach Bitters. This family remedy never gripes, evacuates too copiously or weakens the bowels. If there is any other tonic aperient in or out of the pharmacopoeia of which this can truthfully be said, we are unaware of it. Many from the famous habit of dosing and use this benign regulator, which also sets right weakened stomachs and disordered livers. Rheumatism, neuritis, sleeplessness, indigestion, malaria, debility and kidney complaints are troubles all conquerable by the Bitters.

When Baby was sick, we gave her Castoria.

When she was a Child, she cried for Castoria.

When she became Miss, she clung to Castoria.

When she had Children, she gave them Castoria.

Children Cry for Pitcher's Castoria.

Ethel—"You don't suppose George would marry me for my money, do you?" Ma—"It might be worth trying; he's awfully hard up."—New York Herald.

ADVICE TO WOMEN

If you would protect yourself from Painful, Profuse, Scanty, Suppressed or Irregular Menstruation you must use

BRADFIELD'S FEMALE REGULATOR

CANTONVILLE, April 28, 1890. This will certify that two members of my immediate family, after having suffered for years from Menstrual Irregularity, being treated without benefit by physicians, were at length completely cured by one bottle of Bradfield's Female Regulator. Its effect is truly wonderful. J. W. STANAGE.

Book to "WOMAN" mailed FREE, which contains valuable information on all female diseases. BRADFIELD REGULATOR CO., ATLANTA, GA. BY ALL DRUGGISTS.

PROPOSALS. NOTICE TO CONTRACTORS!

CLERK'S OFFICE. BOARD OF COMMISSIONERS OF OHIO COUNTY. WHEELING, W. VA., April 6, 1892.

Sealed proposals will be received at this office until the 20th inst., at 9 o'clock a. m., for the following county work, to be done during the present year, upon the roads named:

Hogges Hill, Springer's and Bushfield's, Triadelphia district, 65 cubic yards macadamizing. Coal Run and Springer's, Triadelphia district, 150 cubic yards macadamizing. Fugue's Run, 150 cubic yards macadamizing between Fugue's Run and Bean's shop; 115 cubic yards macadamizing between Bean's shop and district line.

Greenville, Clinton and Potomac, Liberty district, 200 cubic yards macadamizing between district line and Harvey's; 150 cubic yards between Harvey's and Potomac.

Kelly's barn and Bement cemetery, Liberty district, 100 cubic yards macadamizing; 150 cubic yards of gravel macadamizing between Fugue's Run and Kelly's barn to Pennsylvania line, 200 cubic yards macadamizing.

Middle Wheeling Creek, lower end, 250 cubic yards macadamizing, creek to foot of hill; 100 cubic yards of macadamizing between district line and Middle Wheeling Creek, upper end, 100 cubic yards macadamizing.

McGraw's 100 cubic yards macadamizing. Monument and Big Wheeling, 90 cubic yards macadamizing.

Pogue's Run, 20 cubic yards macadamizing. West Liberty and Bethany, second division, 150 cubic yards macadamizing. Wheeling and Elm Grove, Ritchie district, 250 cubic yards macadamizing, west of school house; 50 cubic yards macadamizing east of school house.

Wheeling and Fairmont, 325 cubic yards macadamizing; 100 cubic yards support wall. West Union and Honey's Point, first two miles, 250 cubic yards macadamizing; second two miles, 175 cubic yards macadamizing; last three miles, 150 cubic yards macadamizing.

Hogges Hill, Springer and Bushfield's, Richland district, 65 cubic yards macadamizing. Little Run, 250 cubic yards macadamizing. Dixon's Run, 250 cubic yards macadamizing. Elm Grove and Hogges Hill, 250 cubic yards macadamizing.

Gilmore's crossing to Patterson's hill, 210 cubic yards macadamizing.

Glenn's Run and Cherry hill, 150 cubic yards macadamizing.

Atte and Wiedemann, 70 cubic yards bridge masonry and 400 cubic yards grading.

Honey's Point to H. S. and H., 120 cubic yards macadamizing.

Reilly and Delaplain, 75 cubic yards macadamizing.

Wardle and Warden's Run, 330 cubic yards macadamizing.

West Liberty and Harvey's, 180 cubic yards macadamizing.

West Liberty and Castleman's Run, 150 cubic yards macadamizing.

Wheeling and Ridge, 200 cubic yards macadamizing.

Wheeling and Elm Grove Triadelphia district, 70 cubic yards macadamizing.

Brown's Run, Triadelphia district, 60 cubic yards macadamizing.

Brown's Run, Richland district, 40 cubic yards macadamizing.

Trustwork to Rodgers', 70 cubic yards macadamizing.

Little's Run, 45 cubic yards macadamizing. Bids for grading must be separate for earth, loose rock and solid rock, and must be by the cubic yard for each class of material. Macadamizing is to be of hard blue or gray limestone, broken to pass through a three-inch ring any and every way.

Above quantities are approximate only, and are liable to be changed. Proposals should be endorsed "Proposals for County Work," and must state full names of bidders, with postoffice address, and must be accompanied by the names of two responsible parties who will become sureties for the faithful performance of contracts, if awarded. For further information apply at this office, or at the office of W. C. Smith, County Engineer, 1155 Chapin street.

The Board reserve the right to reject any or all bids. ap9 HENRY H. PENDLETON, Clerk Board of Commissioners.

Notice to House Painters.

Sealed proposals will be received by the Secretary of the West Virginia State Fair until the 18th day of April, 1892, at the hour of 2 o'clock p. m., for painting with two good coats of white lead paint all the outside woodwork of the Main Exposition Building, Machinery Hall, Restaurant, Penn street office and gates, South Front street office and gates, Grand Stand and Horticultural Hall, including the ceiling of Horticultural Hall.

The Committee on Grounds reserve the right to reject any or all bids. ap9 GEO. HOOK, Secretary.
